Abstract (en)
[origin: DE102006008086A1] The rear windscreen arrangement for a motor vehicle, with a rear windscreen (26) which is movable by a guiding device between a position closing off the interior (20) of the vehicle, and a lowered position. In the lowered position, the rear windscreen is accommodated in a stowage device which is movable between a holding position and a stowing position. The stowage device comprises a holding cassette which encompasses the rear windscreen. The rear windscreen is provided for a movable roof section (14) of a folding top (10) of a vehicle.
