Abstract (en)
[origin: WO2007093740A2] A device (D) is dedicated to the control of communications of communication terminals (T1, T2) capable of establishing at least telephone or multimedia communications. This device (D) comprises control means (MC) responsible, when a telephone or multimedia communication is established between a first communication terminal (T1) of a first user and a second communication terminal (T2) of a second user, and when an action on the first terminal (T1) causes the second terminal (T2) to be placed on hold, for proposing the establishment of an instantaneous messaging communication via the Internet or an Intranet between communication terminals of the first and second users, so that they can exchange text messages.
