Abstract (en)  
[origin: DE102007021004B3] The machine has sifter plates (5, 6) arranged in a housing (1), and a coarse goods dispensing part such as coarse goods funnel (2) and medium goods funnel (3) provided, where the coarse goods retained by the sifter plates are removed through the coarse goods dispensing part. A fine goods dispensing part i.e. fine goods funnel (4), is provided, where the fine goods separated by the sifter plates are removed through the fine goods dispensing part. A cross-flow separator (8) is integrated in the fine goods dispensing part, where the fine goods are de-dusted by the cross-flow separator.
