Abstract (en)

[origin: EP1987946A2] The press has parallel pressure modules (1, 2) for actuating a guided ram pressure plate, and for clamping of work pieces. Pressure carriages (16a, 16b) which move in opposite directions are connected with one another to a closed system, where the pressure carriages are connected with one another at its ends, which are at a distance from a drive side. An eccentric drive (25) is attached to both the pressure carriages, where the eccentric drive has two extender wheels (26, 27), which are displaced to one another around 180 degrees.
