Abstract (en)

[origin: EP1988199A1] The tool (2) has a body (10) with a positioning unit (11) for positioning the tool in consistent with a pre set division. The positioning unit has a cutout and a slit (12) provided in the body. The slit extends in a longitudinal direction of the body. A rib is provided on the body, and extends in the longitudinal direction of the body. The positioning unit is provided on a narrow side (13) of the body. The body has a support section (5), where the positioning unit is provided on the support section. An independent claim is also included for a knitting machine comprising a bar.
