Abstract (en)
Suction device for collecting waste from domestic pets, which can be used or controlled directly by the user, comprising a collection funnel (2), a suction mechanism (3) and a receiving container (4), which can be separated from the device and replaced with another as desired by the user. According to the invention, the funnel (2) channels the flow of air drawn by the suction mechanism (3), simultaneously absorbing and dragging waste (7) located inside the working radius of the drawn airflow. The waste (7) that has been absorbed and dragged by the suctioned air is then introduced into the container (4).
