Abstract (en)

[origin: WO2007099418A1] A sterilizer autoclave, comprising a sterilization chamber (1) and a steam generator (2) fitted with a temperature probe (5) for controlling the steam generation. A method for controlling the working pressure in a sterilizer autoclave is also disclosed, wherein the steam pressure inside the sterilization chamber (1) is controlled by means of a temperature signal, said signal being provided by a probe (5) directly associated to the steam generator (2).
