Abstract (en)

[origin: WO2007095900A1] The invention relates to a wheel carrier with an accommodating device (1) for a rod-shaped body and in particular for a strut unit, wherein the accommodating device (1) has an accommodating region (10) which at least partially surrounds at least one section of the strut unit in its circumferential direction and wherein at least one clamping means (6, 7a, 7b) is accommodated on the accommodating region in order to lock the strut unit in a releasable fashion with respect to the accommodating device (1).
