Abstract (en)

[origin: WO2007093590A1] It includes at least a first conduit (11) through which a fluid (3) circulates, and means for generating a continuous flow of gas (2) that exchanges said heat with said fluid (3), and is characterised in that it includes at least a second conduit (14) through which said gas (2) circulates, with said second conduit (14) including inside it said first conduit (11) through which the fluid (3) circulates, and in that said means for generating the continuous flow of gas include an aspirator (8) whose inlet is connected to said second conduit (14) in such a way that said gas (2) is drawn in and led through said second conduit (14) from an inlet (6a, 6b) to an outlet (7). Climatiser that includes the heat exchanger (1) in which the gas is air. It has a high heat-exchange efficiency.
