Abstract (en)

[origin: WO2007099134A2] The invention relates to a watch provided with time indicators with three dimensions (5, 6, 7) placed at the periphery of the movement (13) of the watch, in the space delimited by the middle (1), the glass (43), the base (9) and the movement (13). The mobility of these indicators is provided by various clockwork mechanisms that are either independent or connected to the principle movement.
