Abstract (en)

[origin: WO2007083068A1] The invention relates to an electric heater (1) comprising at least one halogen radiant element (2) connected to an electrical power supply, and a first reflecting member (3) capable of receiving and reflecting energy produced by the radiant element, characterized in that it includes a reflection shell (4) in which the radiant element is placed, the shell being made in such a way that the radiation emitted by the radiant element is directed onto a first reflecting surface (5) formed by the first reflecting member, the first reflecting member being placed above the heating element with said first surface facing the heating element.
