Abstract (en)

[origin: EP1989953A1] The fitting (2) has an access opening (9) bordering a side wall (7) and providing access to an interior (11) of a corner cupboard only over a part of width. Two supporting arms (15, 16) are mounted at two mutually spaced points (19, 24) on an underside of a shelf (3) to pivot about vertical axes. A support bearing (17) displaceably supports the arm (15), and a pivot bearing (26) defines a vertical pivoting axis for the other arm (16). The support bearing has a linear guide (18) which defines a horizontal pull-out direction for the arm (15).
