Abstract (en)

[origin: EP1989967A1] The furniture has a seat cushion (3) extendable from a sitting position to a couch position of a furniture frame (1). The seat cushion has a front panel (15). A set of lever supports (11-14) pivots the front panel from a position to another position, where the front panel covers the front side of the seat cushion in the former position. The front panel lengthens a sitting and/or a couch surface of the seat cushion. The lever support engages a sitting cushion frame (4) at one side and at the front panel at the other side.
