Abstract (en)

The present invention related to a dispensing device (1) for dispensing a number of fluids, comprising a movable support (2), a dispensing assembly (3) supported on said support, each dispensing assembly comprising a fluid reservoir (4) and a pump (5) having a dispensing opening (7), a stationary pump actuation device (12) configured to cooperate with a pump, and a stationary cleaning device (8) for cleaning a dispensing opening (7) positioned at a cleaning location, wherein said cleaning device comprises a cleaning brush (11) comprising a central portion (14) rotatable about an axis of rotation and a number of bristles (15) extending from said central portion, and a driving device wherein said bristles are arranged on only a part of the circumference of said central portion so that in a rotational rest position of said cleaning brush none of said bristles contacts said dispensing opening when positioned in said cleaning location.
