Abstract (en)  
[origin: EP1990190A2] The roller printing machine has a printer unit (13) for printing, particularly multiple printing material webs (A,B,C). The roller printing machine has a web guiding device, by which each printing-material web is transported. The printing-material web is processed at an upper side and at a lower side with the help of a processing device positioned in the area of the web guiding device depending on the web guidance of each printing-material web by the web guiding device.
