Abstract (en)

[origin: EP1990452A1] A knitted fabric in which a large hole does not form at a boundary portion of a front and a back knitted fabric parts even when knitting the knitted fabric to a tubular form through double system knitting is provided and a method of knitting a tubular knitted fabric of performing continuous knitting to a tubular form through double system knitting by feeding knitting yarns from two yarn feeders by using a flat knitting machine having at least a pair of front and back needle beds so that stitches can be transferred between the needle beds is provided. The knitting method includes the step of forming a boundary wale at a boundary of a front and a back knitted fabric parts; wherein the boundary wale is formed by continuously forming stitches by twisting the stitches, and winding a knitting yarn different from the knitting yarn forming the twisted stitch on the twisted stitch.
