Abstract (en)

[origin: EP1990474A2] The foot (18) has a base plate (22) running transverse to an extension of a hollow section leg (20) and projecting laterally over the hollow section leg. The base plate is formed as integral extension of a rear side wall (24) of the hollow section leg, and the base plate is bent relative to a side wall of the hollow section leg around 90 degrees. The base plate extends over a cross-section area of the hollow section leg where the hollow section leg is formed as a slotted square profile. The base plate is integrally connected with the side wall opposite to a slotted side wall.
