Abstract (en)
A closing device for a mobile door or shutter (A), for a front element of a mobile drawer or similar, comprising at least a blocking means (2) connected to a driving means (3) which moves said blocking means (2) between a blocking condition (B), in which it may match with a stopping means (4) and an opening condition in which it does not interfere with the stopping means (4). The blocking means (2) is connected in a rotating manner to a first rotating pin (5).
