Abstract (en)
Window with covering fins of adjustable type, comprising at least a peripheral frame (10) which can be assembled and secured to a corresponding opening of the inhabited building walls and is provided with metallic protection bars (12) against any possible intrusion and house-breaking, said covering fins (13) being assembled on to the peripheral frame (10) and co-operating with the protection bars (12), and displaceable contemporaneously by a leverage arrangement (20, 24) into different orienting positions, from an opened position to a closed position, and vice versa, wherein the interior of the inhabited building is respectively visible and not visible through the fins (13), by passing for different intermediate adjustment positions.
