Abstract (en)

The machine has a cooler for condensation of gaseous refrigerant and/or gaseous sorbent mixture (3). Utilization of heat applied for a cooling unit is provided as process heat in a working operation of the machine. A heating medium is provided for driving out refrigerant from the refrigerant/sorbent mixture. A heat exchanger is provided for heat transfer between liquid sorbent e.g. water/lithium bromide solution, and refrigerant mixture. A storage tank is provided for storage of fresh water. An independent claim is also included for a method for drying moist cleaned articles in a household machine in a work space of a household machine.

Abstract (de)

Es wird eine Haushaltmaschine mit einer Kühleinheit vorgeschlagen, die erweiterte Möglichkeiten zur Wärmeausnutzung der für die Kühleinheit aufgebrachten Wärme als Prozesswärme im Arbeitsbetrieb der Haushaltmaschine bietet. Dies wird erfindungsgemäß durch die Verwendung eines flüssigen Sorptionsmittels und/oder eines flüssigen Sorptionsmittel/Kältemittel-Gemisch erreicht.
