Abstract (en)
[origin: US2009152269A1] A cap comprises a body suitable for being associated with a container neck and provided with a dispensing arrangement, a lid arranged for closing said dispensing arrangement, an opening indicating device connected to the lid through a breakable arrangement and comprises a hooking arrangement arranged for engaging with a corresponding further hooking arrangement of the body, wherein with the further hooking arrangement there is associated a guide arrangement arranged for limiting deformations of the opening indicating device when the hooking arrangement interacts with the further hooking arrangement.
