Abstract (en)

[origin: WO2007101611A1] An apparatus for forming stacks of flat products (10) has a first transportation section (12) for transporting a stream of individual flat products of a first type (16), a second transportation section (18) for forming an overlapping stream (22) of the flat products of the first type (16) and a stacking unit (42) for forming individual stacks (54) from the overlapping stream (22). The invention proposes providing a supply unit (26) for flat products of a second type (30), wherein the supply unit (26) passes the flat products of the second type (30) into the stream of individual flat products of the first type (16) in an inline manner.
