Abstract (en)

A color decorating wire includes at least one color wire (22) of a different color and a transparent plastic skin (23) formed on the color wire by an extrusion molding or an injection molding and wrapped completely onto the color wire. The transparent plastic skin (23) includes at least one connecting plate (230) extended outward from a surface of the transparent plastic skin, and each connecting plate (230) is extended axially along the color decorating wire, and the color decorating wire is suitable to be fixed onto an object (3) by the connecting plate, so that the color decorating wire concurrently provides glittering and color changing effects.
