Abstract (en)
A depilator includes a depilating head(2) and a depilating head support. The depilating head(2) has two clamping devices on its main shaft(3) radically, so that the depilator can depilate hair twice when the main shaft(3) rotates a circle. The depilating head support has a support body (15). A depilating head locating seat (16) is settled at the upper ends of two sidewalls of the support body(15). A depilating head pressure roller(17) is removably inserted in the depilating head locating seat (16). The rear end of the depilating head pressure roller (17) is set against a spring piece(18), which is fixed on the support body(15).
