Abstract (en)

The invention relates to a device for changing the set up of a seat (12) associated to a seat support unit and operating between a stationary body (13) and a seat support (18) pivoted to said stationary unit (13) so as to be capable of oscillating about a pivoting axis (Y). The set up changing device comprises cam means (24) turnable by a user and transmission means (25) interacting with said cam means (24) so as to transform the rotating movement of the cam means into an oscillating movement of the support (18).
