Abstract (en)
[origin: EP1992512A2] The roof device (8) has a main gemel (14) with two rockers (15, 16) to move around a main supporting component (11). A main vehicle roof component (17) is connected with the main gemel at inside of a set of live knots (24', 25). An additional vehicle room component (20) is fixed behind the main vehicle roof component. The additional vehicle room component and the main gemel are connected inside another set of live knots (27, 28) that are placed between the former knots (24', 25) of the main supporting component.
