Abstract (en)

[origin: EP1992801A2] The motor vehicle (1) has a water circulation for cooling a combustion engine (2). The water circulation has an electrically operated engine blower (5). The engine blower has a linear automatic controller (8), and is thermally coupled to the water circulation. The linear automatic controller is engaged in thermal contact with a water pipeline (7) of the water circulation. Independent claims are also included for the following: (1) a radiator for water circulation of a motor vehicle (2) a condenser radiator fan module.
