Abstract (en)

Radio control for electrical devices comprising a container body (2) provided with push buttons (3) provided inside which is an electronic card including an electronic receiver (51), an electronic transmitter (52) for transmitting an univocal code towards such electrical devices and a microprocessor (4) to which the signals generated by pressing such push buttons (3) are delivered and which controls such transmitter and receiver and which determines such transmittable univocal code. Furthermore, the radio controller comprises a digital combiner (43) made up of a plurality of switches with two or more positions which delivers the signal generated to such microprocessor.
