Abstract (en)

[origin: EP1993116A1] The power switch block has a lower section and an upper section (3), where the upper section has an adjustable switching cover (4). A mounting unit is provided in the upper section for attaching the upper section with the lower section. An opening (6) is provided at each mounting unit on the switching cover. The switching cover is arranged with an opening in longitudinal direction (L1) of the power switch block between a primary safety device measurer of a primary protection unit and a secondary safety device measurer of a secondary protection unit.
