Abstract (en)
[origin: EP1993175A2] The device has a feeding device for feeding a cable to a processing station by a cable guide (4), a cable gripper (5) and a guide tube (6). The guide tube is movably supported in a guide of a pivot arm head (3) parallel to its longitudinal direction. The tube is engaged with the cable guide by the cable gripper in an open position or is movable from an area of the cable gripper in a resting position by a spring (7), in which a front end of the gripper projects above the pivot arm head of about a length of the gripper.
