Abstract (en)
[origin: WO2007104430A1] The invention relates to a rack insert for dishwashers, having a curled clip (4) to which a neck section (60) of a bottle (6), preferably a baby's bottle, can be fitted on holders (5). In order to ensure said rack insert is of simple construction and is suitable for placing bottles in the disk rack, a strut (7) is arranged at a distance from the curled clip (4), which strut has arranged on it upwardly protruding spikes (8) for laterally supporting the bottle (6) or another item (16) to be washed, wherein the rack insert can be suspended on a base (2) of a dish rack (1) such that the bottle (6) is inclined to a certain extent in relation to the strut (7) and the spikes (8).
