Abstract (en)

[origin: EP1970133A1] The device has a supply unit, which provides a cleaning medium, a nozzle unit, which is configured for feeding the cleaning medium into the core engine, and a line connection (10) between the supply unit and the nozzle unit. The nozzle unit has a unit for the rotationally fixed connection to the fan shaft of the jet engine. A rotary coupling (5) is provided between the nozzle unit and the line connection. Independent claims are also included for the following: (1) an arrangement of a device and a turbo fan jet engine (2) a method for cleaning the core engine of a jet engine by the device.
