Abstract (en)

[origin: WO2007105965A1] A method of preparing a solution for use in DNA amplification reactions, including the steps of, mixing a binding agent with a base solution; subjecting the mixture (of a binding agent and base solution) to a stimulus which activates the binding agent, and upon activation, the binding agent binding to any DNA in the base solution so that it is unreactive and is not co-amplified during the DNA amplification reaction.
