Abstract (en)

[origin: WO2007106080A2] A hybrid air conditioning system (45) having both a conventional air conditioning system (46) and thermoelectric modules (80, 85, 90, 95) to provide heating and cooling, the thermoelectric modules (80, 85, 90, 95) providing waste heat or waste cooling to offset the demand on the conventional air conditioning system (46) and thereby reducing energy consumption and enhancing efficiency of the overall system (45).
