Abstract (en)
[origin: WO2007104415A2] The invention relates to a refrigerator and/or freezer comprising a carcass with an interior wall, behind which a cooling element of the cooling circuit is disposed to chill the interior, and a cover plate that is placed in front of the interior wall of the carcass in the interior of the carcass. The inventive refrigerator and/or freezer is characterized in that the cover plate is retained in the interior by means of removable fastening means and can be removed from the interior such that the interior can be alternatively used with or without the cover plate.
