Abstract (en)

[origin: WO2007105084A1] The invention relates to a method for displaying content on a mobile communication terminal hosting a personal security token, said method consisting in displaying HTML pages (20, 21, 22, 23) which are linked together so as to constitute a path of pages in which an end-user person can progress according to choices made by the end-user person along such path, characterized in that the personal security token comprises an engine which identifies a command of a set of Sim Tool Kit Service Bytecodes (10, 11, 12, 13) on the basis of a said choice of the end-user person along the path and converts such identified command of the set of Sim Tool Kit Service Bytecodes (10, 11, 12, 13) into an HTML page (20, 21, 22, 23) to be displayed to the end-user person.
