Abstract (en)

[origin: WO2007101647A1] The invention relates to a brushholder mount for contact brushes of a commutator machine having spring elements, which have brush shoes connected to the contact brushes, which conduct the contact brush current and which prestress the contact brushes in the direction of the commutator of the commutator machine. The invention provides for the spring elements (4, 5) to be connected to at least one further elastic element.
