Abstract (en)

[origin: EP1994855A2] A module is disclosed. The module (20) includes a pair of uprights (22), each being of adjustable-height. The module is used in a grouping of two or more with an equal grouping of work tops. In the grouping, which forms a workstation, the modules and the worktops are secured to one another in alternating relation such that each work top is supported at its ends by a respective pair of modules and is independently height-adjustable. A modular furniture system based on the module is also disclosed.
