Abstract (en)
[origin: WO2007107167A1] The invention concerns a method for producing a multi-ply paper product (4), comprising the steps of feeding an upper ply (1) with a first feeding velocity (V4) into a stuffing nip (5), the upper ply having cushion recesses (10) embossed therein and feeding a middle ply (2) with a second feeding velocity (V2) into the stuffing nip for stuffing at least a portion of the middle ply into the cushion recesses of the upper ply, the second feeding velocity being higher than the first feeding velocity.
