Abstract (en)

[origin: WO2007107668A2] The invention provides an arrangement for mounting an interior trim element (10) on a structural body element (12) of a motor vehicle, which comprises a transverse element (20) for retaining the trim element (10) in the mounted position on the structural body element (12), which is arranged longitudinally rearwards of the front transverse face (16) of the trim element (10), and which comprises an element (26) for locking the trim element (10) in terms of movement transversely with respect to the structural body element (12), characterized in that the locking element (26) comprises a rod (28) which can cooperate with the transverse retaining element (20), and comprises a rear end head (30) which bears longitudinally towards the rear against a face situated opposite the front wall (16) of the trim element (10).
