Abstract (en)
[origin: WO2007107529A1] A handle element (1) for a window or a door comprises a handle part (2) on or in which a power supply unit (17), a transmitter module (18), an antenna, and a switching unit (6) are provided. According to the invention, the switching unit (6) has at least one switch (7, 8) for actuating a peripheral device which can be activated via the transmitter module (18) and the antenna. As a result, the handle element (1) may also take over a control function.
