Abstract (en)
[origin: EP199770A1] The lift door panel (60) has a double lip and an edge protector in a region of an edge (66), where the double lip is C-shaped. A perforation is provided in a region of the double lip at a bending region, and a fastening part is provided in the double lip, where a screw acts as the fastening part. A hole is in an upper region for attachment of the door panel. The double lip is in a lower region for attaching a door panel guide. An independent claim is also included for a method for manufacturing a lift door panel.
