Abstract (en)

[origin: EP1997954A1] In a process to operate a paper mill with a paper-making assembly (2) that feeds two off-line processing stations (3, 4) operated in parallel, each station has a roll cutter (5, 6) and/or a calender (7, 8). Both off-line processing stations are operated either alternately at full capacity, or with one at full throughput and the second at less than full capacity.
