Abstract (en)

[origin: EP1997988A2] The mechanism has a coupling unit provided for connection of an actuating rod with a lengthwise-relocatable drive rod of a drive rod fitting. The coupling unit stands away from a back of housing. The housing includes a fastening unit for holding a mounting plate of the housing in a recess at a double hinged window. The fastening unit stands away at side surfaces limited to a back of the housing. The fastening unit is formed as resting unit (30) clamped with spring elements (28, 29).
