Abstract (en)

[origin: WO2007107219A1] The invention relates to a motor vehicle air conditioning system, in particular for a standstill mode, having at least one electrically driven compressor (2), having at least one evaporator (3) and at least one electrically driven evaporator fan (5) which is assigned to the evaporator (3), and having at least one condenser (4) and at least one condenser fan (6) which is assigned to the condenser (4), wherein the voltage which is applied to the condenser fan (6) is regulated as a function of the high pressure downstream of the compressor (2) and of the suction pressure at the inlet of the compressor (2), and to a method for regulating a motor vehicle air conditioning system of said type.
