Abstract (en)
[origin: WO2007110301A2] A container comprising a body part and a top section with openings for dispensing the contents of the container, the top section which can be closed by a hinged flip-top lid, wherein the body part of the container, top section and hinged flip-top are all made in one part of e.g. a plastic material. Such a container can be used e.g. to dispense spices. Such container can be made in one piece (except the bottom closure) by injection moulding, by preferably making the body section in a tapering shape.
