Abstract (en)  
[origin: DE102006014846A1] The device (1) has two check valves (2a, 2b) arranged in series with elastically deformable valve bodies (3a, 3b). The valve bodies are designed as a poppet valve, and sealing edges (5a, 5b) are formed at a valve housing (4). The valve bodies are provided with tapered surfaces (6a, 6b) facing the sealing edges, where the tapered surfaces (6a, 6b) and tapered surfaces (7a, 7b) have different opening angles. The valve bodies are made of high-strength flexible material such as high-strength, flexible metal.
