Abstract (en)  
[origin: DE102006014062A1] The operating method, involves accessing an illuminating unit (19) by issuing the control signals (21) and tracing of an analog measuring signal. The analog measuring signal, which is compared with the comparators (4,12) and the comparator value is adjusted within an operating condition of the illuminating unit. Independent claims are also included for the following: (1) a control unit for operating device for illuminating unit, which is equipped for the execution of the method (2) an operating device for illuminating unit (3) light, which exhibits a illuminating unit and operating device.
