Abstract (en)
[origin: EP2000413A1] The assembly has an upper platform (2) placed on a pallet base (1) that comprises main central panel extended through lateral panels. End panels are perpendicularly extended, in a large dimension direction from the central panel, through complementary junction panels that are connected to the end panels by articulation plies. Junction panels are folded at 90 degrees and superimposed with a surface of assembling panels after assembling. The assembling panels comprise ends superimposed with an internal surface of the lateral panels after assembling.
