Abstract (en)

The present invention refers to a washing machine having visual means for indicating to a user the amount of washing agent to be introduced in the machine for performing washing operation. The washing machine according to the invention comprises a drawer (1) slidably received within a housing (2) said drawer (1) having at least one compartment (4) adapted to receive an amount of a washing agent and further comprising visual indication means (5) for indicating the amount of washing agent (9) to be introduced for performing a washing operation. The washing machine is characterised in that said visual indication means (5) comprise at least one light means (6, 7) displaced so as to provide an indication of the compartment filling level that has to be reached by introducing said washing agent (9) within the compartment (4).
